MF3023, MF3024

RELIABILITY, COLOUR AND SUPERIOR PERFORMANCE

Olivetti's A4 colour multifunctional d-Color MF3023 / d-Color MF3024 systems, delivering up to 30 pages per minute, have been designed specifically for the demands of medium-sized workgroups.

Complying with the most recent environmental standards, these machines provide fast reliable output in both mono and colour. With a resolution of 1,200 x 1,200 dpi, they are the ideal solution when high quality print work is required.

The wide 7" colour touch screen allows simple direct access to an array of highly productive functions.

Even processing complicated jobs is made easy by built-in programmable keys, while the advanced solution platform (JAWS) allows information to be shared, resources optimised and workflow improved.

A Scan Extension kit option is available for generating searchable PDF files while the Olivetti Mobile Print app supports AirPrint® compatibility to enable printing from a smartphone or tablet, without a physical connection to the company network being required (option IB-36).
